

Right Patient, Right Blood

Blood and Transplant

'Do you know who I am?'
Positive Patient Identification leads to Right Patient, Right Blood EVERY TIME

Transfusion Awareness Campaign 2012

Right Patient, Right Blood
Factsheet for Healthcare Staff

Right Patient, Right Blood

Do they know who you are?

Have you been asked:
Your full name and your date of birth?
Have the staff checked that your identification band is correct?

This is important as it ensures you get the right blood.
Remember - It is OK to ask the staff to make sure they know who you are.

BETTER BLOOD
TRANSFUSION TEAM
