

Delivering care for mother and children in developing countries: the experience of Doctors with Africa CUAMM

**Dr. Fabio Manenti
Project Department Head,
Doctors with Africa - CUAMM**

**Istituto Superiore di Sanità,
Rome, 5th April 2018**

CUAMM: >60years... approach

HEALTH SYSTEM (WHO definition)

- Governance and Leadership
- Health services delivery
- Health workforce***
- Health Financing
- Health Information System
- Medical products, vaccines & technologies

District Health System:
effective coverage, access to quality,
efficient and equitable health care

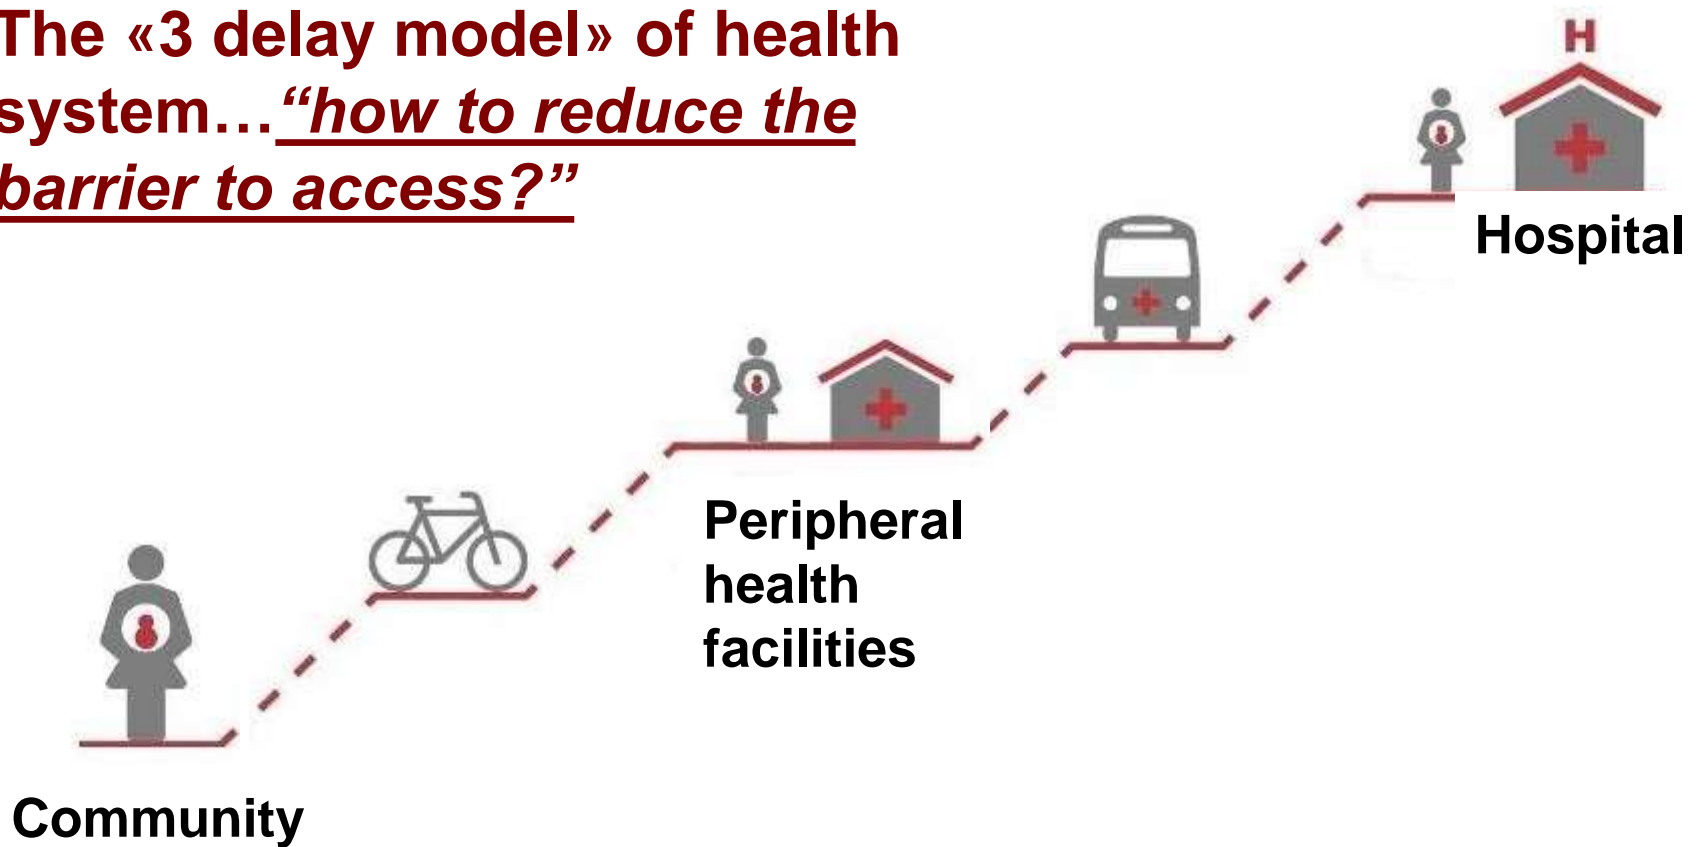

***Capacity building**
(training schools, university ect.)

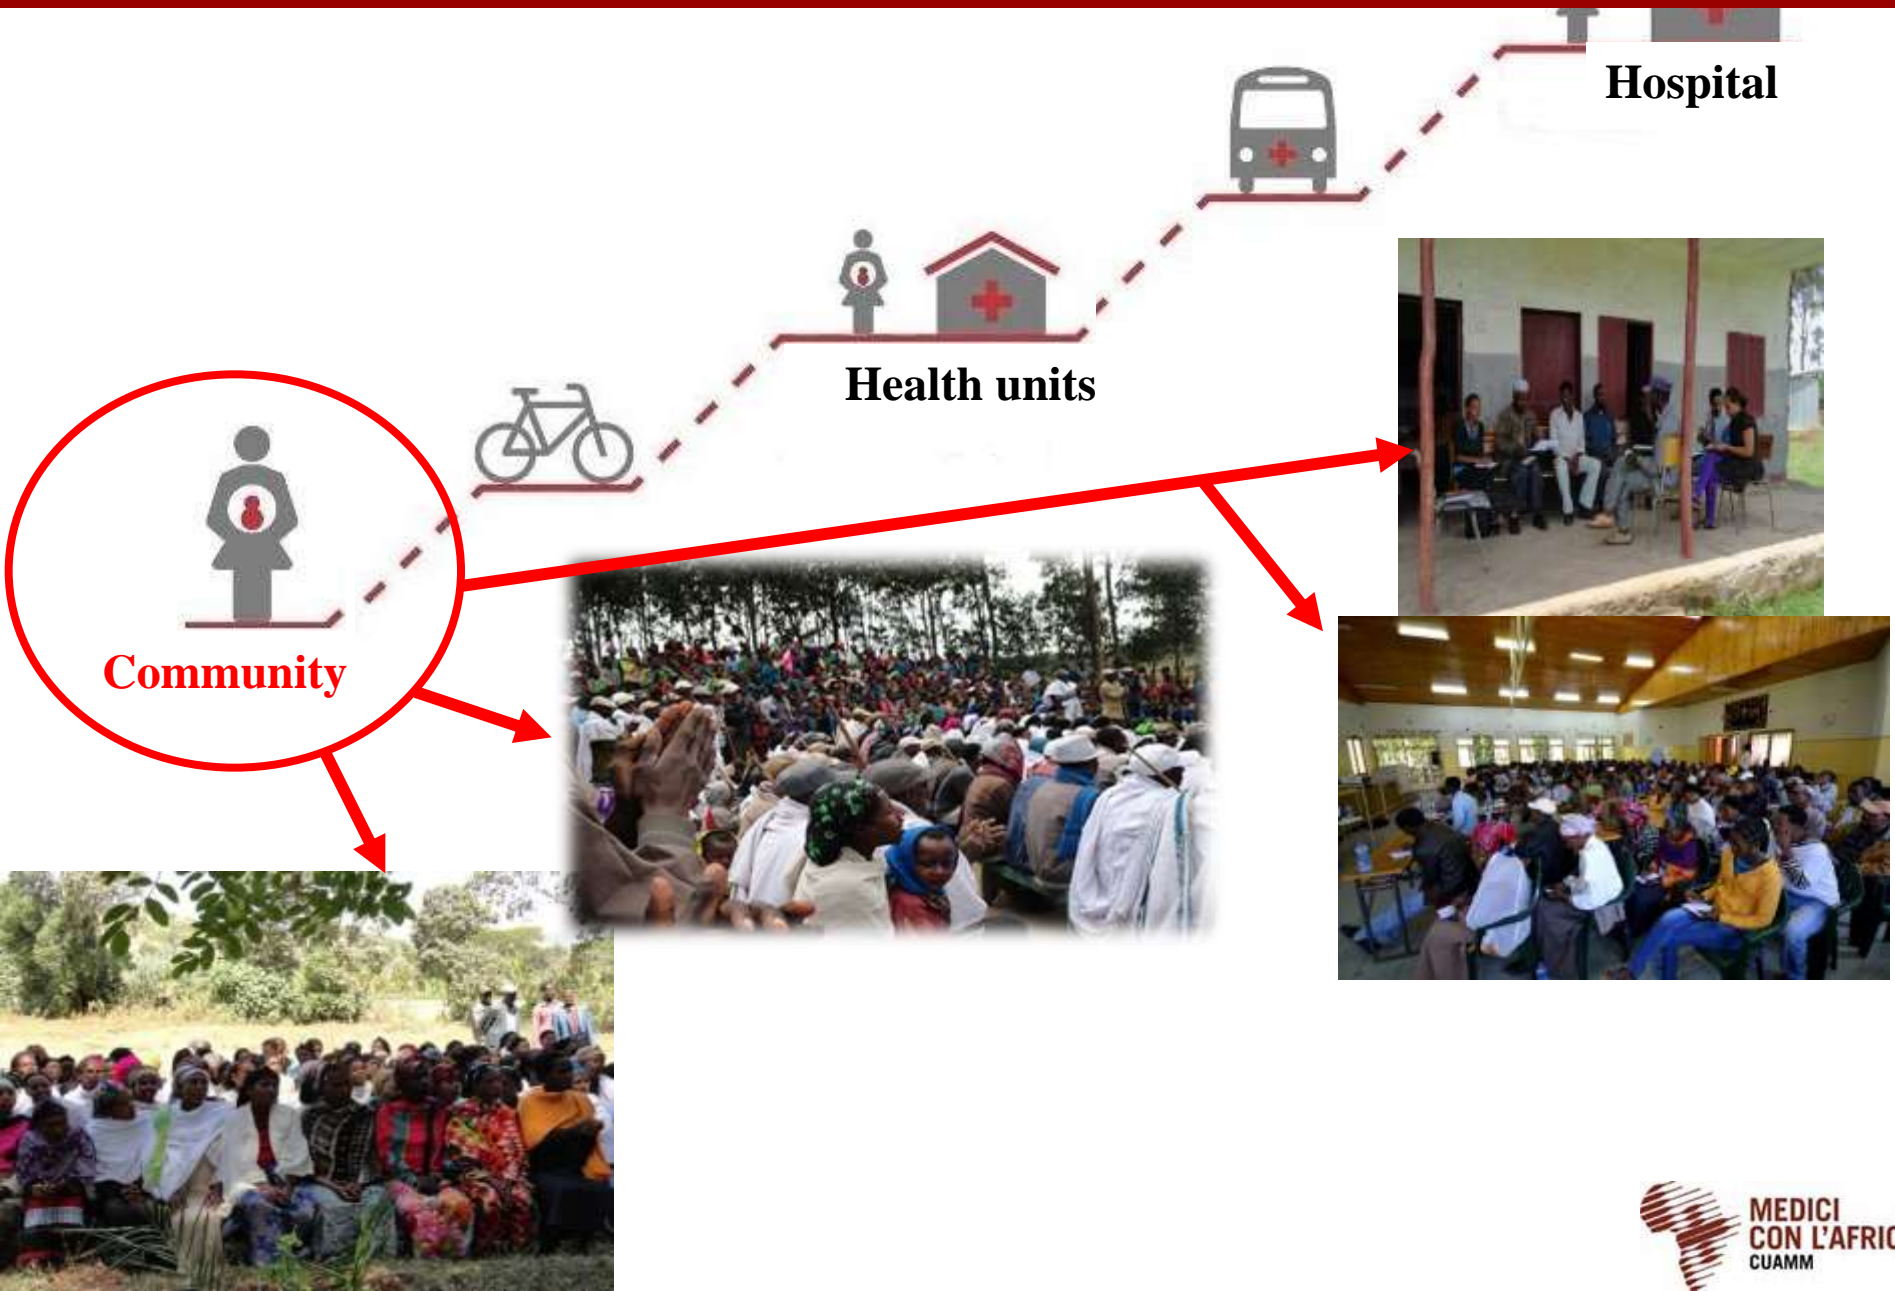

Health System Strengthening: based on context analyses and in agreement with national and district plan and with local stakeholders

Main gaps for maternal health:

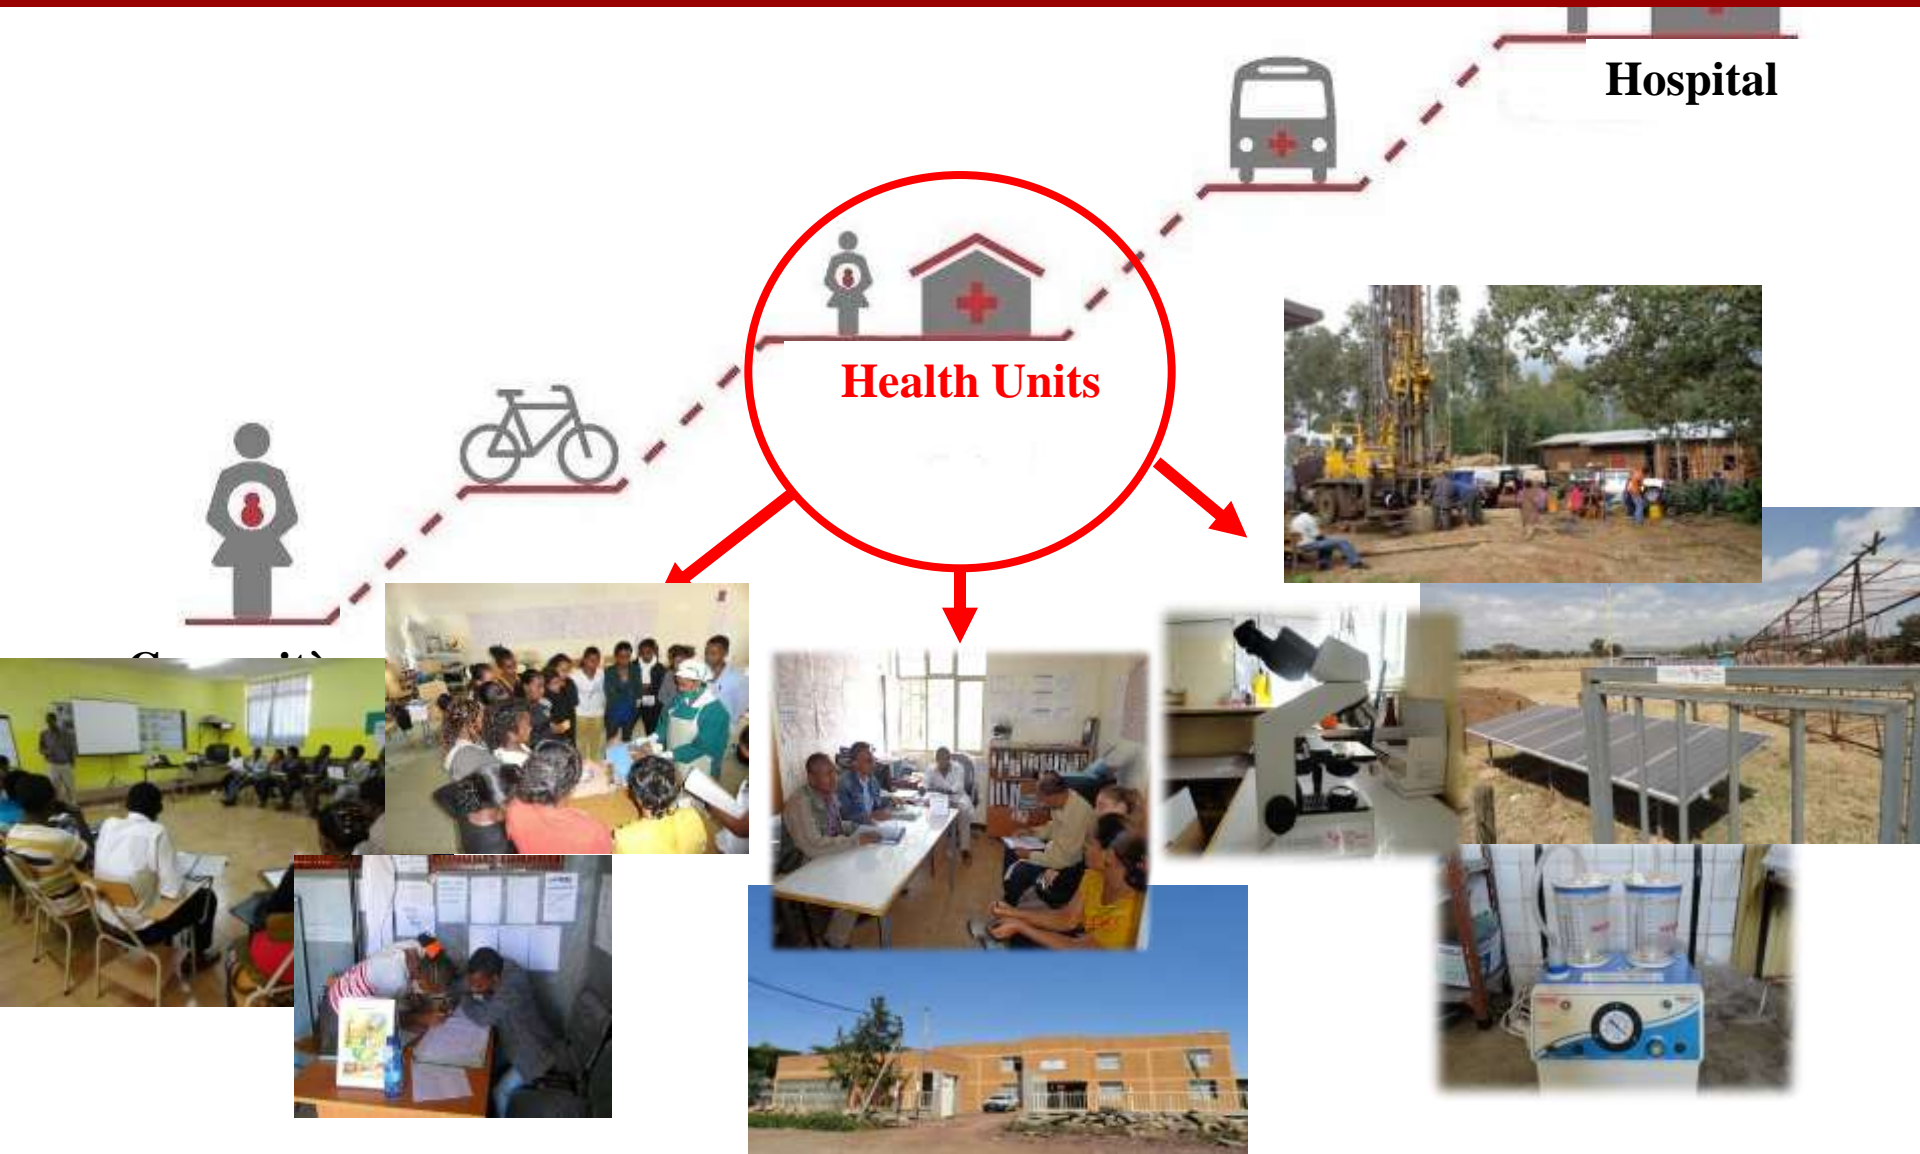

The «3 delay model» of health system... “how to reduce the barrier to access?”

Addressing main gaps for maternal health:

Addressing main gaps for maternal health:

Addressing main gaps for maternal health:

Mother and children first: 2012- 2016

A Public Private Partnership to increase access to quality delivery

**Aber Hospital
Oyam, Uganda**

**Chiulo Hospital
Ombadja, Angola**

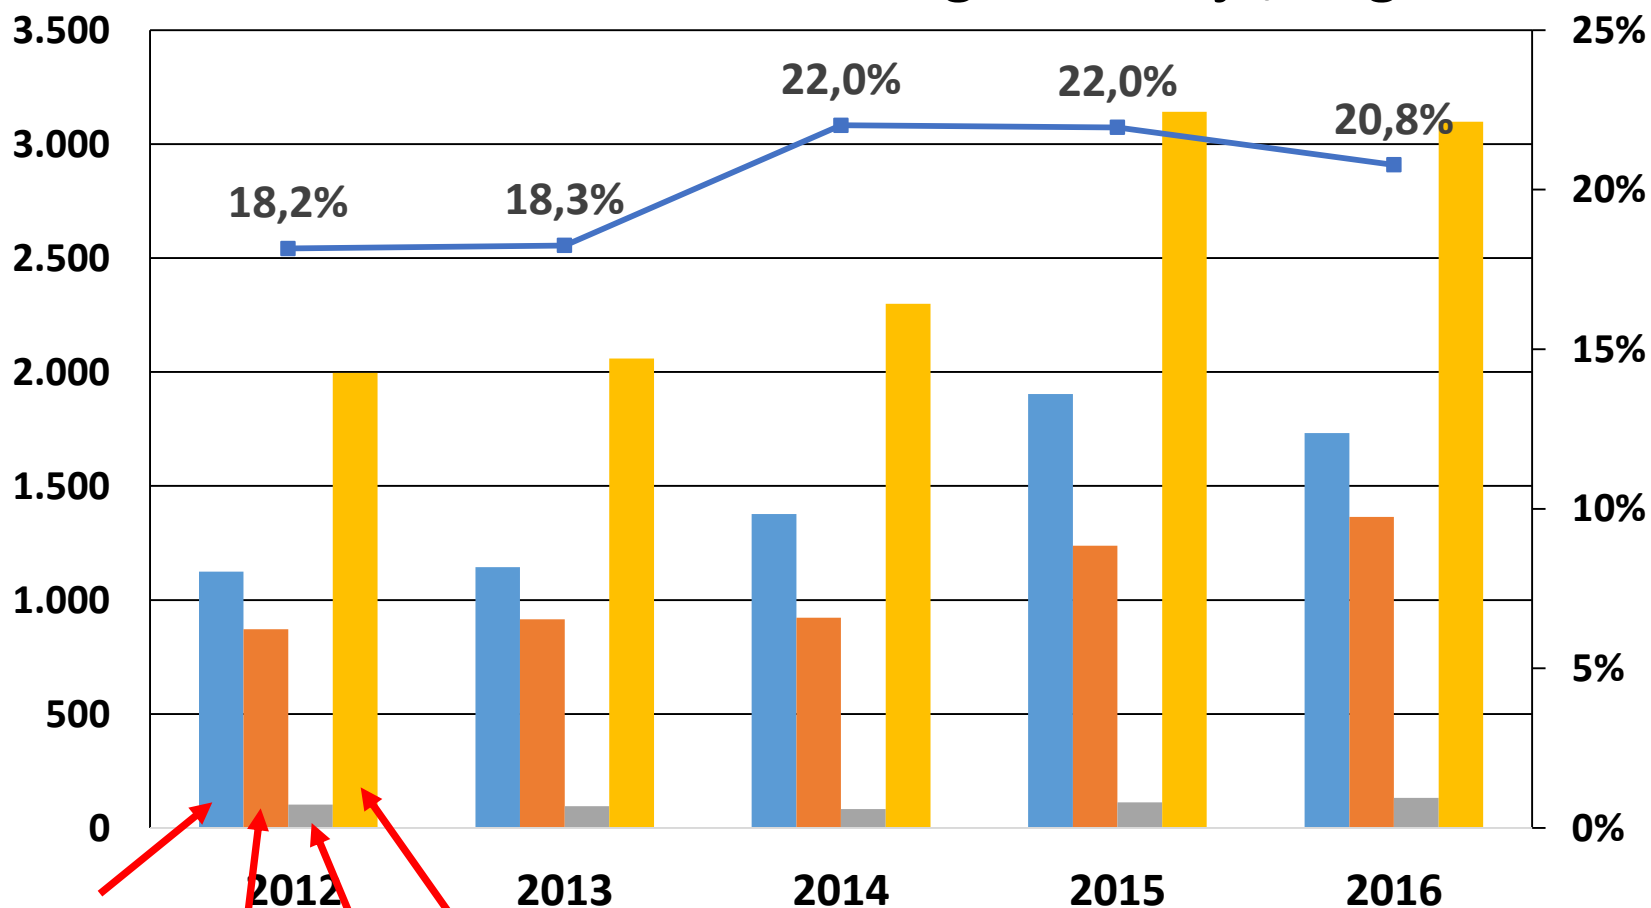

**Wolisso Hospital,
South West Shoa, Ethiopia**

**Tosamaganga Hospital
Iringa Rural, Tanzania**

Angola: from 15% to 45% of coverage

Deliveries trend and coverage Ombadja, Angola

HCs deliveries

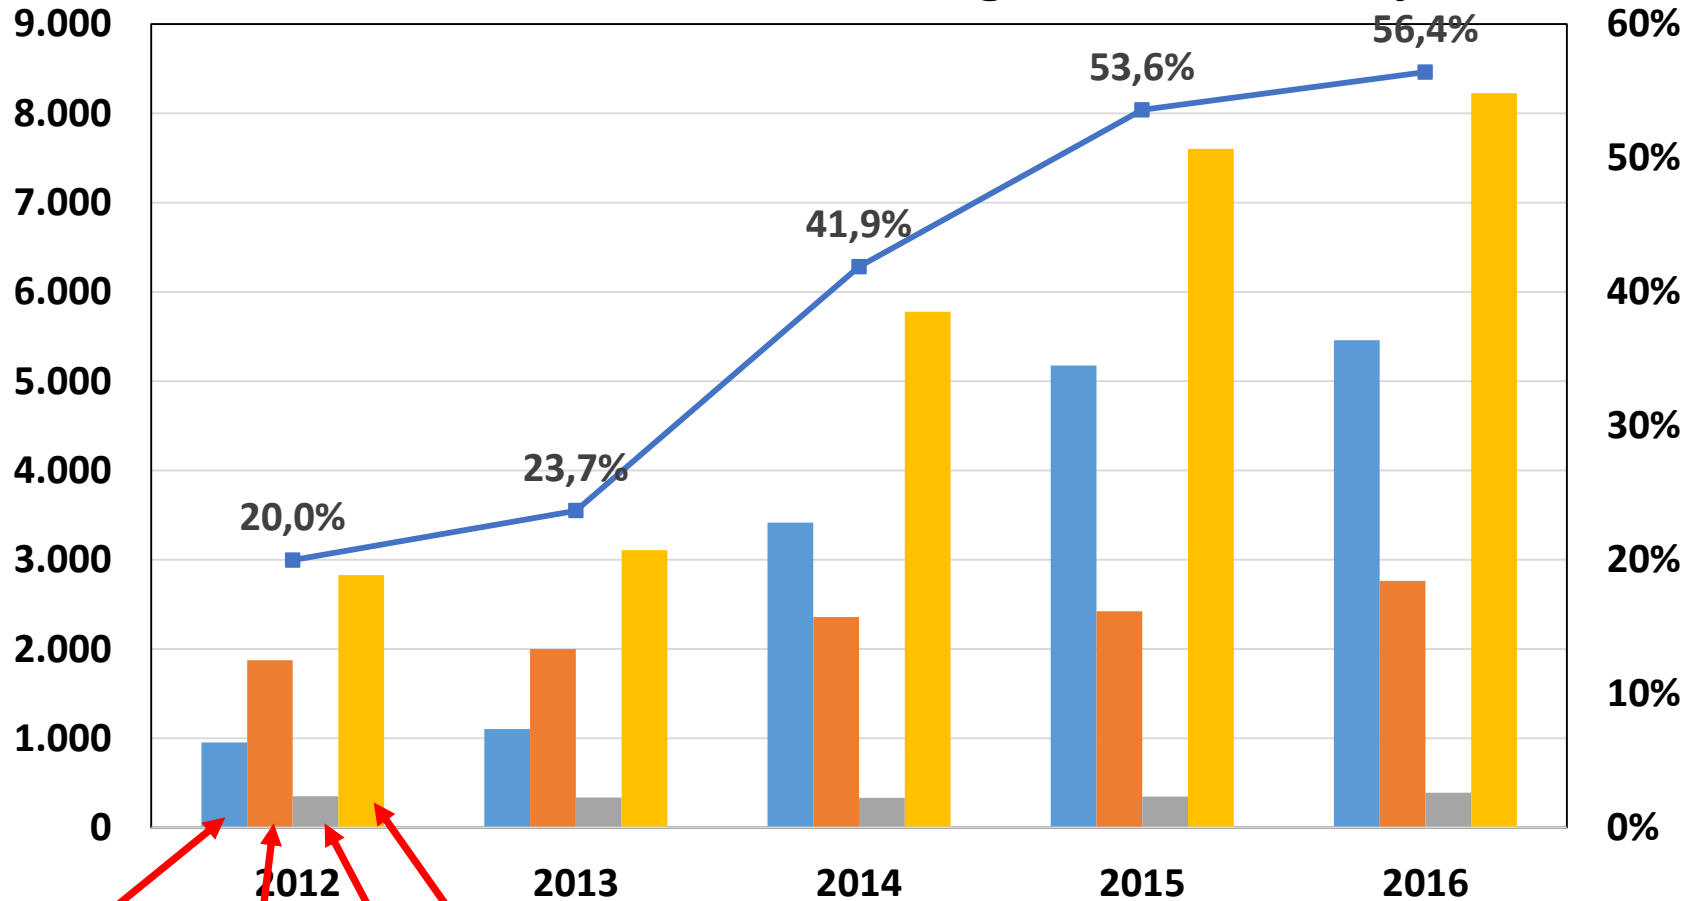

Hospital deliveries

Cesarean sections

Total deliveries

Etiopia: from 16% to 46% of coverage

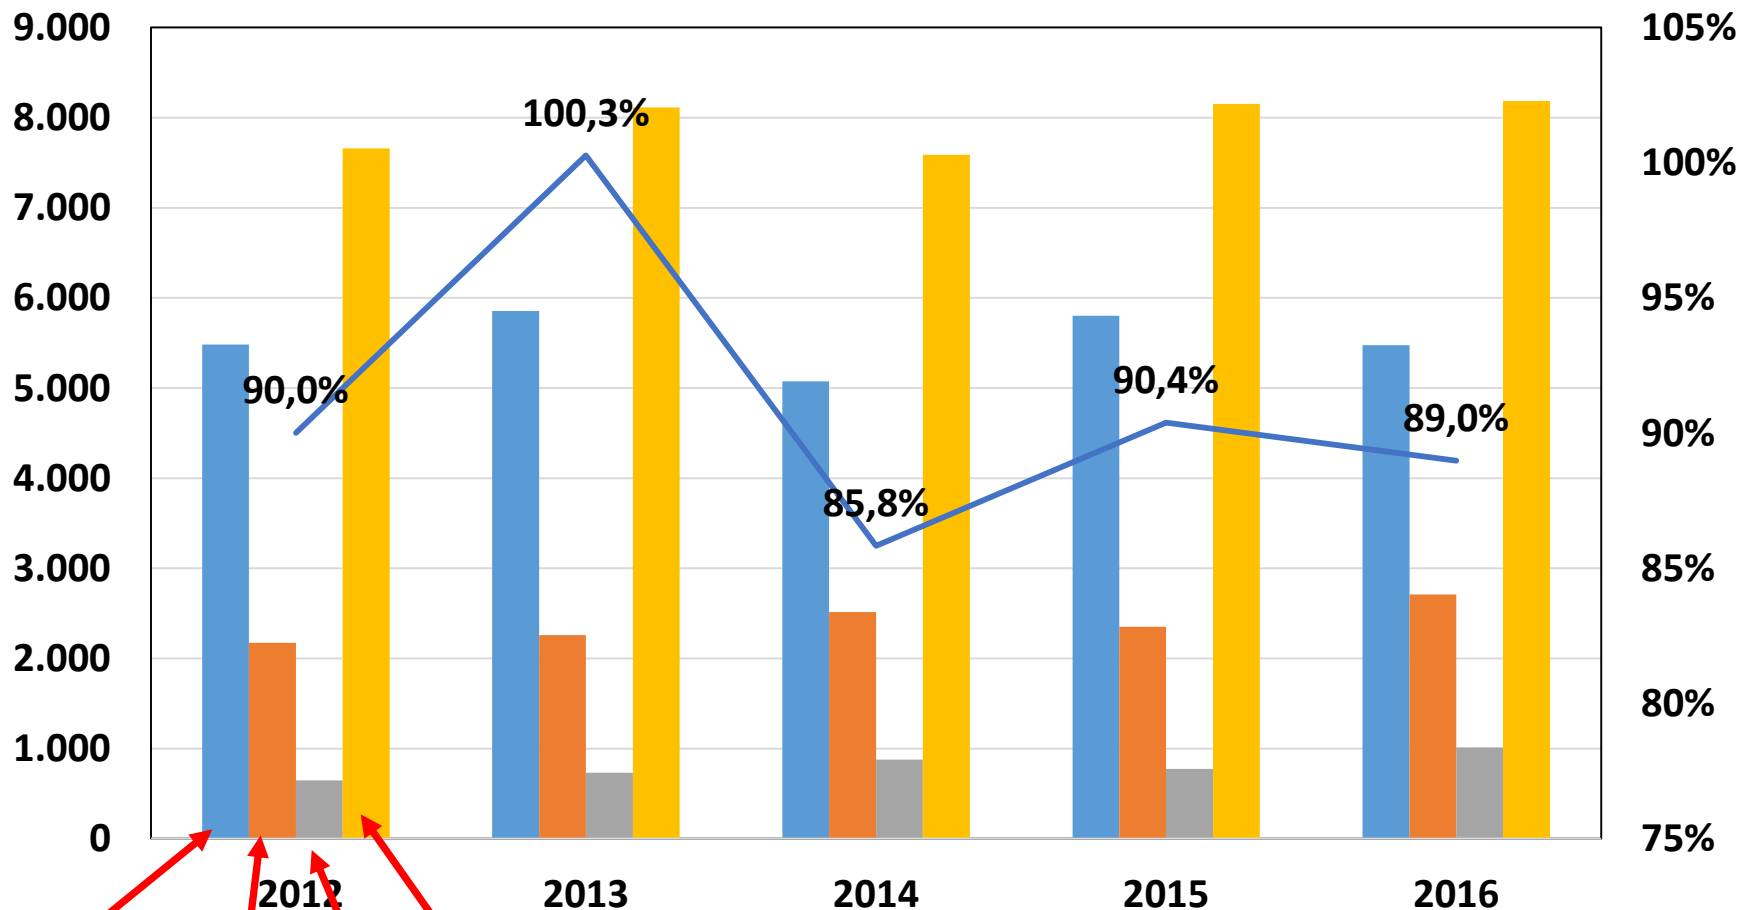

Deliveries trend and coverage, Wolisso Etiopia

HCs deliveries
Hospital deliveries
Cesarean sections
Total deliveries

Tanzania: from 68% to 88% of coverage

Deliveries trend and coverage, Tosamaganga, Tanzania

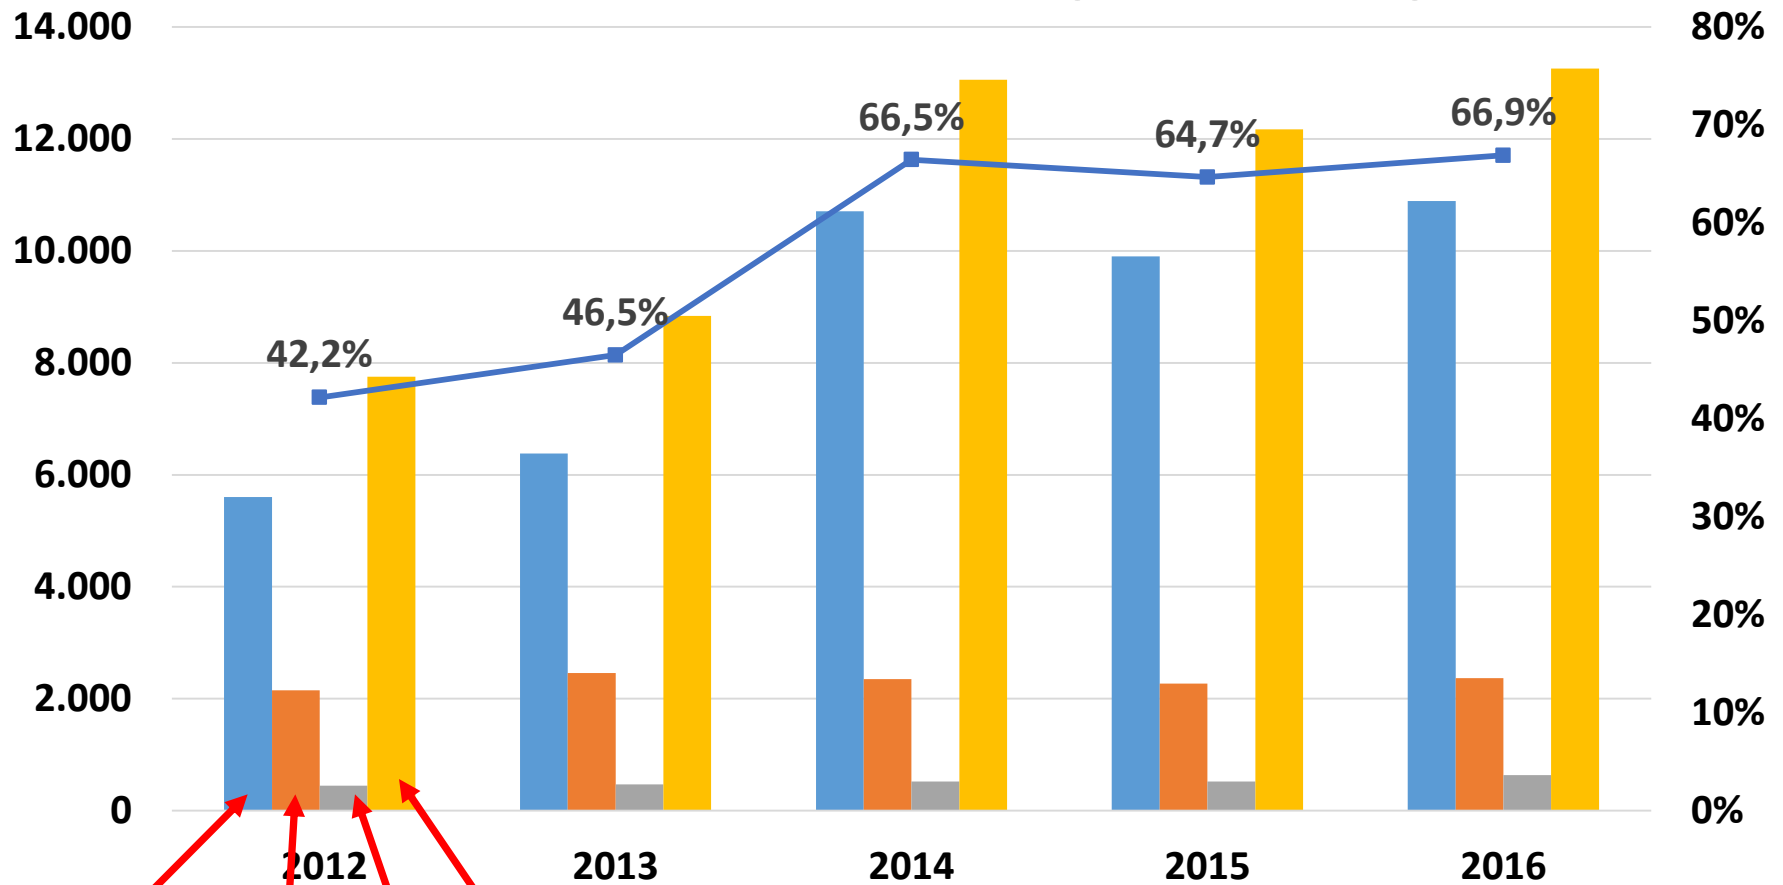

HCs deliveries
Hospital deliveries
Cesarean sections
Total deliveries

Uganda: from 32,7% to 53% of coverage

Deliveries trend and coverage, Aber, Uganda

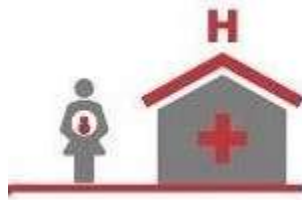

HCs deliveries
Hospital deliveries
Cesarean sections
Total deliveries

TARGET 125.000 DELIVERIES..... ACHIEVEMENTS

Antenatal care

308.102

Total assisted deliveries

134.910

Ambulance transports

5.929

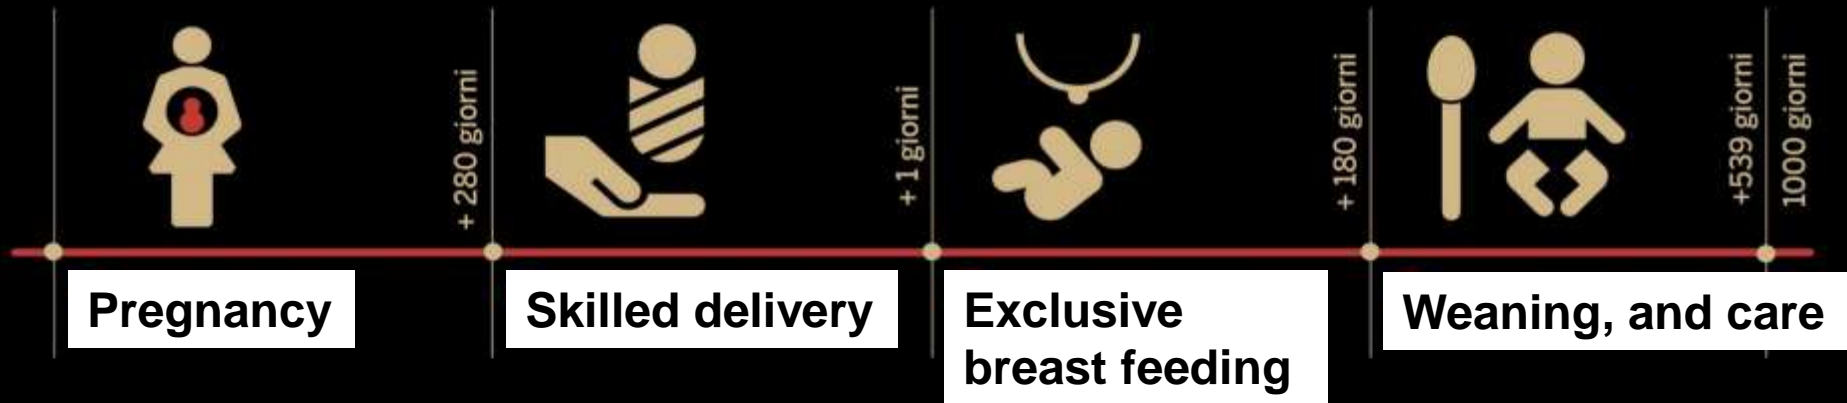

Health staff trained

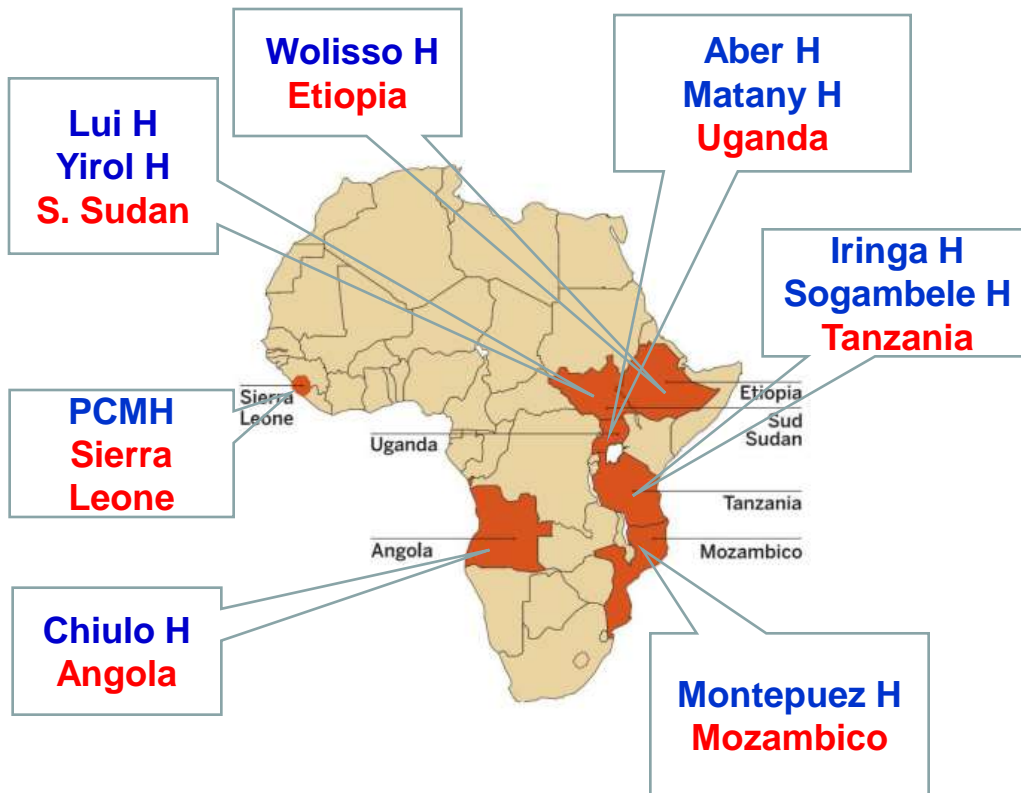

590

Mother and children first: the first 1.000 days 2017- 2021

...safe delivery is the first step, yet not enough if development and nutrition of the newborn and child are impeared....

...from 4 districts to 10 districts involved..

Target

- 320.000 skilled deliveries
- 10.000 acute malnourished treated
- 50.000 children followed during growth

COMMUNITY INTERVENTIONS

Education and prevention

Diet diversity

Monitor of growth and early identification of malnutrition
